

Project Introduction

We have been commissioned by LocalLife to help with the creation of an app to promote local coffee shops and also help consumers find the perfect coffee shop for them based on their preferences. We will need to seamlessly integrate AI and google maps into the app to allow for necessary features that will help businesses to find customers and to allow consumers find the right coffee shops for their current needs.

While keeping two way communication with LocalLife we aim to create a great and intuitive app.

Steps:

- 1: Create project brief.
- 2: Hold meeting with team leaders to plan out necessary tasks, dividing them between the appropriate groups.
- 3: Each group will create a plan in regards to our given deadline.
- 4:
